

Xilinx Global Services – On Budget. On Time. Every Time.

The Design Challenges of Time & Complexity

- System designers are faced with two rapidly growing challenges: shrinking time-to-market product development cycles; and the increasing complexity of product design
- Today's competitive environment demands the timely, efficient delivery of your most innovative solutions
- To beat the competition, you must be on budget, on time, every time

The Global Services Solution

- The Xilinx Global Services team offers you the resources you need to respond successfully to these challenges
- Xilinx Global Services delivers a complete portfolio of services that extend your technical capabilities and accelerate your time-to-market

Training Solutions That Put You On The Fast Track to Success

World Class Instructor-Led Training

Instructor-led training gives you the advantage of learning about our products from a team of world-class trainers. Our instructors have first-hand knowledge and expertise with our products and technology. The instructor's goal is to accelerate your success, enabling you to get the most from the powerful capabilities of Xilinx products and technology. By attending an instructor-led course you will become more competent and confident learning a few tricks of the trade through lecture and practical lab work. These classes can be brought to you on-site, or you can attend one at any public location around the world.

Accelerate Your Progress With Recorded E-Learning

Recorded e-Learning can help you get up to speed quickly on the powerful capabilities of Xilinx technology. These recordings are currently available at no charge, over the internet, anytime, day or night (English language only).

Live e-Learning Right At Your Desk or Laptop

Live e-learning (North America only) provides the traditional instructor-led courses in a series of lectures and labs that can be delivered with a live instructor online, and viewed from the comfort of your desk. The course modules are scheduled sequentially over a one-to-two-week period, depending upon the subject.

Xilinx Global Services: Programs & Solutions

Xilinx Productivity Advantage (XPA) Bundled Solution

The Xilinx Productivity Advantage (XPA) program provides a tailored solution to meet the needs of your entire engineering organization. An XPA delivers the productivity tools you need when designing with Xilinx programmable logic devices. Xilinx software, training credits for Xilinx Education Services, Xilinx IP cores, and Xilinx demo boards and cables can all be included as part of an XPA.

Kick Start Your Project With QuickStart!

QuickStart! offers you the expert assistance you need right when you need it most – at the start. QuickStart! combines two days of on-site, tailored training with three days of expert consulting from an experienced application engineer. Specific types of QuickStart! include: Embedded Processing, PlanAhead™, and TMR.

Improve and Accelerate with Titanium Dedicated Engineering

Titanium Dedicated Engineering provides a dedicated Senior Applications Engineer on a contractual basis to improve your design productivity and accelerate your time-to-market. Our engineers have vast FPGA knowledge including expertise in such areas as: Embedded Systems, Timing Closure, Design Architecture and Tool Optimization.

Achieve Your Design Goals On Time, On Budget, Every Time

Xilinx Design Services (XDS) design engineers are experts in the latest FPGA technologies and specialize in extracting the most out of FPGAs. Our services include:

- Turn-key system FPGA design
- Embedded processor system design and software application design
- FPGA module development
- Certified project management and development processes
- A proven track record of on-schedule and on-budget releases
