XTP025 (v4.3) October 21, 2013

---

**Note:** As of Vivado Design Suite 2013.1, all new Vivado release notes for IP will be handled by answer records. See [http://www.xilinx.com/support/index.html/content/xilinx/en/supportNav/design\\_tools.html](http://www.xilinx.com/support/index.html/content/xilinx/en/supportNav/design_tools.html). XTP025 will continue to document IP updates for ISE Design Suite only.

Xilinx Intellectual Property (IP) cores, including LogiCORE™ IP for the Connectivity, DSP and Embedded application spaces, are provided in the Xilinx Vivado™ Design Suite and ISE® Design Suite software. The Design Suite software enables you to generate these IP on your desktop.

New IP and IP versions are provided in each Design Suite release. Detailed listings of these new IP and IP versions can be accessed on release-specific IP Update information pages linked from the Xilinx.com [Intellectual Property](#) area ([www.xilinx.com/ipcenter/coregen/updates.htm](http://www.xilinx.com/ipcenter/coregen/updates.htm)). The latest Design Suite releases are available from the [Xilinx Download Center](#).

This document contains a listing of release note tables, one for each IP core. Within each release note table you will find a list of links to multiple answer records. Release note information for a particular version of a core is provided in an IP-specific answer record.

A given version of an IP core is intended to be used with a specific version of Design Suite software. The release note tables in xtp025 display the version of Design Suite software which can be used with a particular IP core version.

Please note that this hypertext document is intended for online use only.
